为何我们会衰老？

环境污染、食品农药残留、工作压力、长期面对电脑、不规律生活习惯、吸烟酗酒等会令身体产生大量的自由基。这些自由基会破坏细胞组织，损害细胞液，蛋白质和去氧核糖核酸（DNA），进而制造一连串的反应，并最终使人体产生疾病，加速人体的老化。这些种种因素会导致细胞退化，您看见皮肤上那些皱纹、色素沉积、黯淡、松弛.....都是衰老通过皮肤传达出的现象。

鹿胎素有效成分为蛋白质胜肽、胚胎干细胞、胎盘活性因子和其他特殊且天然的生物活性物质等。

另外还含有18种不同的氨基酸、锌和其他微量元素。尤其，天然的SHCG生物素可直接于女性生殖性腺发挥功效，刺激卵巢功能，从而释放大量的雌激素，使卵巢犹如发电厂般充满能量。当雌激素分泌稳定后，经期不规律、经痛、产后虚弱、色斑等问题都会渐渐消失。此外，鹿胎素有显著性延缓更年期的时间。女性就像是充足营养的花朵可绽放无限的风格（Janer，杜克大学医学博士；崔，国际妇女健康协会）。另外，鹿胎素有助于缓解妇女更年期综合征。

Why Are We Aging?

Environmental pollution, pesticide residues in food, working pressure, facing computer for a long period, irregular lifestyles, smoking and alcohol abuse can cause damage to the body and also produce large amount of free radicals. These free radicals will cause cell and tissue damage and oxidative damage to cellular components such as cytoplasm, protein and DNA. Thus, it creates a chain of reaction which ultimately makes a person suffer from diseases and accelerate the aging process. These factors can lead to cell degeneration such as formation of wrinkles, pigments, dull and loose skin. These are the signs of aging.

Deer placenta contains active ingredients of peptide protein, embryonic stem cells, placental active factor and other special natural bioactive substances. It also contains 18 types of amino acids, zinc and other micronutrients, particularly the natural SHCG biotin that can act directly on women's gonadal axis and stimulate the ovary function to release large amounts of oestrogen, thus the ovary will be full of energy like a nuclear power plant. When the secretion of oestrogen is stable, those problems like irregular menstruation, dysmenorrhea, postpartum frail, speckle and so on will vanish. In addition, deer placenta can delay menopause significantly. Women are like flowers with sufficient nutrition that can bloom in infinite styles (Janer, Medical Doctor of Duke University; Cui, International Women's Health Association). Moreover, deer placenta helps to alleviate women 's climacteric syndrome
